PETITION AGAINST GENETICALLY ENGINEERED SALMON

Despite nearly 400,000 comments in opposition, the Food and Drug Administration (FDA) recently released its Environmental Assessment and a Finding of No Significant Impact, the last steps in its approval of genetically engineered (GE) salmon in December 2012. **To make matters worse, FDA argues that these GE salmon don't even need to be labeled!**

We, the undersigned, vehemently oppose the approval of GE salmon, and support mandatory labeling of genetically engineered fish should they be approved by FDA despite overwhelming public opposition.
