

# JUST SAY WHAT YOU SPRAY AND GIVE US SPACE!

- **There is nothing more important than the health and safety of our ohana.** Children, the elderly, and other sensitive residents have no choice but to live, work, and commute daily in close proximity to areas where restricted use pesticides are being sprayed.

- Of greatest concern are **restricted use pesticides** such as chlorpyrifos, which scientists have definitively linked to developmental delays in children. 27 schools in Hawai'i are located within a mile of large agricultural companies that spray these pesticides.

- **Toxic pesticide drift is extremely dangerous to expecting mothers** and exposure may disrupt critical development processes. The American Academy of Pediatrics has linked early life pesticide exposure to long-term health effects including cancer, decreased cognitive function, behavior problems, birth defects and other adverse birth outcomes, and asthma.

- In Hawai'i we have the **largest chemical companies in the world**, who spray massive amount of toxic pesticides and our held to zero accountability. We, the people have the right to know exactly what hazardous pesticides are being sprayed in our neighborhoods, near our schools and other facilities where our children play.

# TAKE IT TO THE STATE!

## Help us pass pesticide disclosure & buffer zones bills.

These bills require that the State protect our keiki's health and environment from the unintended impacts of large-scale pesticide use by establishing buffer zones and requiring disclosure and notification of toxic restricted use pesticides around sensitive areas such as schools, childcare facilities and waterways.

## Help us say YES to transparency and accountability.

Mandatory public disclosure will ensure the industry is held responsible for the potential impacts of its pesticides on human health and the environment.

## Sign the petition to tell Gov. Ige and our Legislators to protect our keiki!
